Diego Aguayo, February 2nd, 2025.

My flowchart starts with the "start" button, then we have the data which is "x", then we have the question in process "is X greater or less than 100", then in the diamond we have the choices "if yes, if not", finally we have the output "Less" or "Greater", and then Stop.

START

X

is X greater than 100?

if yes,
X = "Greater than 100",
if not,
X = "Less than 100"

"Less than 100"

"Greater than 100"

STOP
